Recorded Presentations

The Beltwide Cotton Conference (BWCC) continues the tradition of putting leading edge information and innovations into producers' hands. The full BWCC Proceedings were mailed and uploaded in May to attendees who purchase them. However, many of that forum's reports - gleaned from the Confex Podium presentation management/recording service - are available online.*

The National Cotton Council is pleased to make these presentations and papers available to the cotton industry through the Confex Podium web site. If you want to view presentations and papers on your computer, all you need is a high-speed Internet connection.

[2023 Recorded Presentations](#)

Session Example: After clicking on the recording link, scroll down and click on a session of interest. Next, scroll down to a presentation you want to listen to and click. First time users may need to download some additional software on their computer to hear and see the selected presentation. Next, the presentation you selected will be downloaded to your computer.

*The Confex Podium presentation service has been available to Beltwide speakers and attendees since the 2006 conference. The primary goal is to enable attendees timely access to a wide range of conference presentations prior to the published proceedings - including reports they did not get to hear at the conferences and reports they did hear but want to review.
